## Cosmology — Assignment 3 — Aberration of Starlight, Redshift, Law of Addition of Velocities

I would also like to have assigned 2-13, which is a crude calculation of the deflection of starlight, but there wasn't time.

1. Taylor and Wheeler 3-9 — Aberration of Starlight
2. Taylor and Wheeler 3-10 — The Expanding Universe
3. Taylor and Wheeler 3-11 — Relativistic Addition of Velocities
